**Notice of Change to the Stepper Motor Rust Preventive Coating.**

Dear Valued Customers,

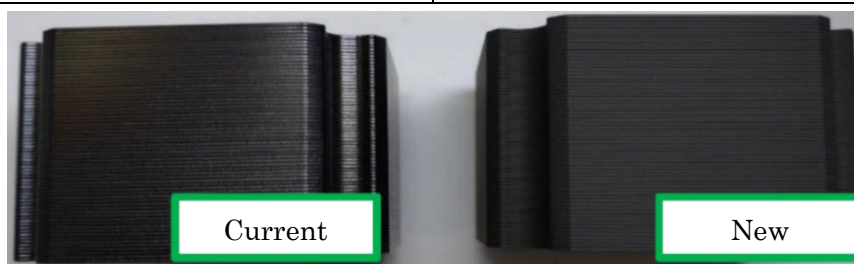

Thank you for continuing to use KSS products, we appreciate for your loyal patronage.

We would like to inform you that we have received a notification from Tamagawa Seiki Co., Ltd., the manufacturer of the stepper motors used in our Linear Actuator External products, regarding a change to the Rust Preventive Coating applied to the motors.

Please refer to following for more details.

1. Product to be changed ; Linear Actuator External (RM, 2TMB, TMB, MB, SiMB)
2. Reason for change ; Due to the discontinuation of Neo Chakuron BC724-05 by Musashi Paint Co., Ltd.
3. Description of Change ;

|                | Current                                           | New                                             |
|----------------|---------------------------------------------------|-------------------------------------------------|
| Manufacturer   | Musashi Paint Co., Ltd.                           | Edogawa Gosei Co., Ltd.                         |
| Product Name   | Neo Chakuron BC724-05                             | EDOBOSEI EBM702 Black                           |
| Type           | One-component bake-curing epoxy coating for metal | One-component epoxy-modified resin, bake-curing |
| Film thickness | 15 ± 5 μm                                         | 15 ± 5 μm                                       |
| Appearance     | Semi-matte black                                  | Matte black (non-gloss)                         |

4. Effective date ; The new Rust Preventive Coating will be introduced once the current inventory has been depleted.
