**Support Unit which are just-sized for our Miniature Ball Screw selections!**

This time, we would like to introduce our Compact Support Unit (MSU Series) which are just-sized for our miniature Ball Screw selection.

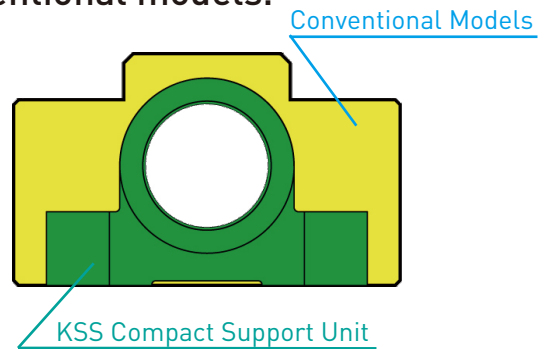

■ 2 types are available below

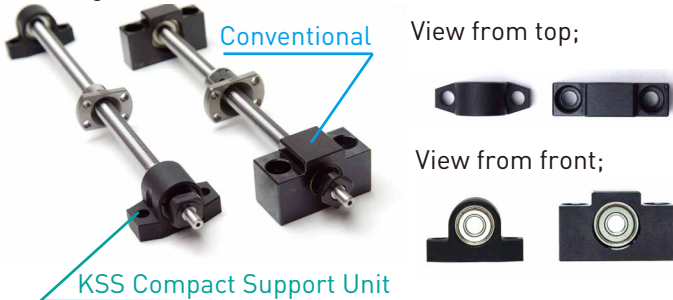

We prepared its housing as the pillow-type, and the flange-type as standard selection to meet each of your application.

■ Less 50% weight compared to conventional models.

■ Mass is dramatically reduced compared to Conventional Models

- Keep the center height compatible, shorter pitch with its fixing holes.

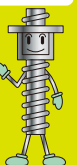

■ Newly designed exclusively for these Compact Support Unit

- With designing the outer diameter as small as possible for compactness of whole unit
- No oil seals required as angular bearing with shield plated.
- Compatible for clean-room environment with SUS material and low-emission grease.

For more information on our Catalogue 

Not only for the Ball Screws, but also with the Support Unit saves the mass for compactness! Ideal for saving space!
